

1. Background / Problem

Many international students face difficulties **before arriving in Australia**.

Common problems include:

- They **cannot inspect rental properties in person**
- They struggle to **buy basic necessities** (mattress, kitchen items, hair dryer, etc.)
- They often rely only on **student accommodation**, which can be expensive
- They have **no trusted local person** to help with these tasks

As a result, students may:

- rent unsuitable housing
- overpay for accommodation
- waste time after arrival setting up basic living needs

This creates **stress and inconvenience during the relocation process**.

2. Proposed Solution

I propose building a **service platform (mobile app or website)** designed for international students **before they arrive in Australia**.

The platform would allow students to **book local assistance services in advance**.

These services could include:

- Property inspection
- Purchasing essential items
- Pre-arrival setup support

The goal is to help students **prepare everything before they land in Australia**.

3. Core Features

1. Property Inspection Service

Students can:

- find rental listings
- book a **local helper** to inspect the property
- receive: photos, videos, condition reports, feedback

This helps them **make safer rental decisions remotely**.

2. Essential Item Purchasing

Students can request help to buy basic items before arrival.

Examples: mattress, bedding, hair dryer, kitchen utensils, SIM cards, groceries

The helper can: purchase items and set them up in the accommodation. So when students arrive, **their room is ready for them to live in.**

3. Pre-arrival Task Booking

Students could book services such as:

- airport pickup
- apartment setup
- furniture assembly
- grocery preparation

Everything can be **scheduled in advance through the platform.**

4. Target Users

Primary users:

- International students moving to Australia
- Overseas students who cannot inspect properties in person

Potential future users:

- overseas workers
- migrants relocating to Australia

5. Value of the Platform

This platform solves three key problems:

Convenience: Students can organize important tasks **before arriving.**

Safety: Property inspection reduces **scam risks and bad rentals.**

Time Saving: Students can **start living immediately after arrival.**

Commented [SY1]: Hi Tammy this is Anita saying hi to u

Commented [SY2]: God Good Tammy! I love your idea. How amazing you are.
